Part of the articles of the foundation „Hilfe für Khao Lak Tsunamiopfer e.V.“

This german foundation is a non-profit organisation. The objective of the organisation is to financially support the tsunami victims in the Khao Lak area in Thailand. Especially the following goals should be achieved:

1. support of orphan children until the end of their education through godparenthoods
2. providing a free transportation to and from school for the students of the Pak Weep Primary School and the Bang Niang Primary School as well as providing a free lunch for these students for the next 2 years
3. financial support for poor, ill and disabled tsunami affected people through godparenthoods
4. financial support for starting up small businesses and rebuilding small businesses

Recipients of the help are solely Thai people, who are in need for help as well as social organizations in the tsunami affected region.

Additional informationen about taking over of godparenthoods

Dear interested ladies and gentlemen,
Thank you very much for your interest in our project and in taking over a godparenthood of one or more orphan children. On our website www.khaolakfriends.com under the point » [The orphans](#) you will find an overview of all our orphan children. Over the link » [more](#) you can see some additional information about the particular child.

For all children, under whose name and birthday, no names of godparents are mentioned, we are still looking people who are willing to support these orphan children.

After finishing the formalities we recommend the following procedure to get in contact with your child in Thailand:
To develop a personal relationship with your godchild please create a DIN A4 sheet, on which you write all the personal information about you, you want to tell. For example your address, your phone number, your email, pictures of you and your personal environment, a small map, where you mark your home town and/or pictures of your home town (e.g. on the back of the page). Please just write in English or in Thai.

To make this paper water-proofed and tropicalised we recommend to laminate the page. So the life time of the paper will be longer in Thailand. The delivery of this sheet will be done by us.

Mr./Khun Sam Toomchangreed, the manager of our partner organisation „Orphan Education Foundation“ in Thailand, will hand it over to the child personally. This approach was appreciated by many of our godparents and realised to the pleasure of all parties.

Best regards,

the managing-committee
